Project
"CISE's operationalization launch through A Long Endurance and Real live Test" – CISE-ALERT
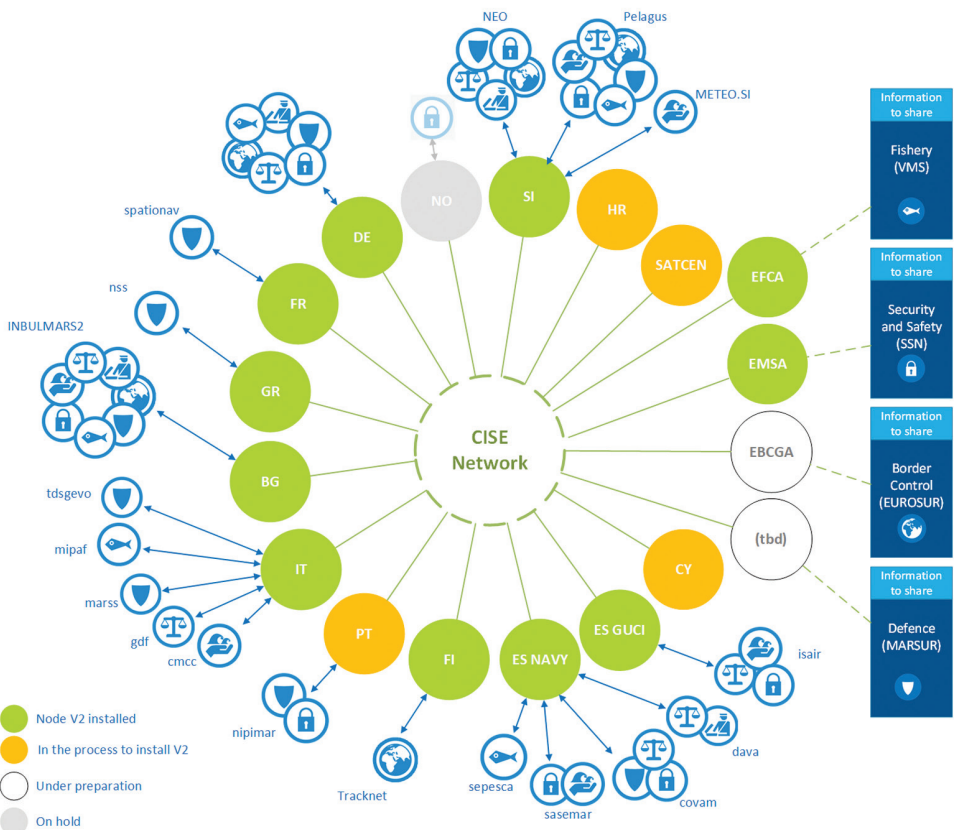

Project CISE-ALERT intends to launch the Common information sharing environment (CISE) as an operational tool to increase the interoperability and cooperation of the EU actors involved in maritime surveillance missions by reinforcing the sharing of information.

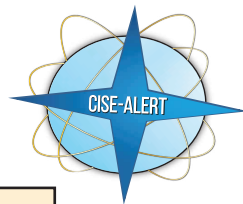

- **Project number: 101092633**
- **Funding programme: European Maritime, Fisheries and Aquaculture Fund (EMFAF)**
- **Total project budget: 2 437 276.24 euro (85% EU funding through EMFAF)**
- **Start date – End date: 1 November 2022 - 31 October 2024**

Context of Project CISE-ALERT

■ **What is CISE?**

The *Common Information Sharing Environment - CISE* is a network that connects systems of authorities with responsibility in maritime surveillance. CISE enables them to exchange relevant information across borders and different sectors, allowing for more effective operations at sea.

In the context of CISE, project CISE-ALERT will act as a catalyzer to test past, ongoing, and short-term activities and developments on CISE with one ambition – to push-up CISE from the current transitional phase to its operational state.
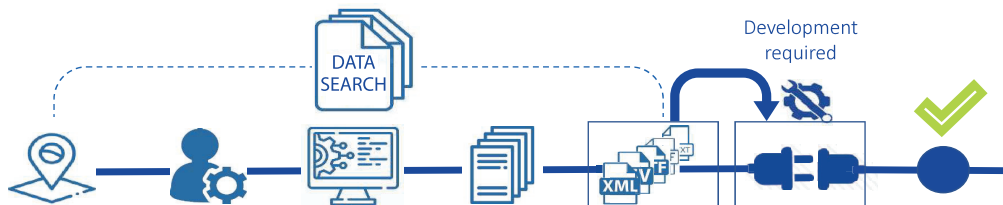

Project CISE-ALERT at a glance

CISE-ALERT

Main characteristics

CISE-ALERT will:

- ✔ **Test the pre-operational services developed during the Transitional phase of CISE;**
- ✔ **Implement and test new operational services;**
- ✔ **Enlarge the CISE network;**
- ✔ **Introduce an actually shared first dataset package;**
- ✔ **Gather a first core community of CISE users (services and authorities).**

Development required

XML

Added value of the project

- ✔ Respond to specific existing needs;
- ✔ Help improve the information exchange in terms of time resources and cost efficiency;
- ✔ Identify and share targeted, reliable and up-to-date key data for specific operations;
- ✔ Establish common procedure and data input that will enable to identify technical developments to be carried out;
- ✔ Contribute to the interoperability of surveillance systems;
- ✔ Reinforce national and cross-border/sector cooperation;
- ✔ Organise data and services, in order to identify and collect additional data outside the Consortium as next step.

✔Common operation services under development
